

CARS Collision Repair Project – Phase II

A presentation to the
Canadian Collision Industry Forum

June 18, 2005

Fredericton, New Brunswick

Overview

- The CARS Collision Repair Project Phase II is well advanced in its goal of developing and delivering an innovative new training curricula for the industry:
 - our approach has been amalgamate the best of existing training assets with new training delivery technologies; and,
 - to create strategic, collaborative partnerships with training providers and key industry suppliers to provide industry with a range of technical and non-technical training that is:
 - convenient;
 - cost-effective; and,
 - of high quality.

Repair and Service

Our game plan

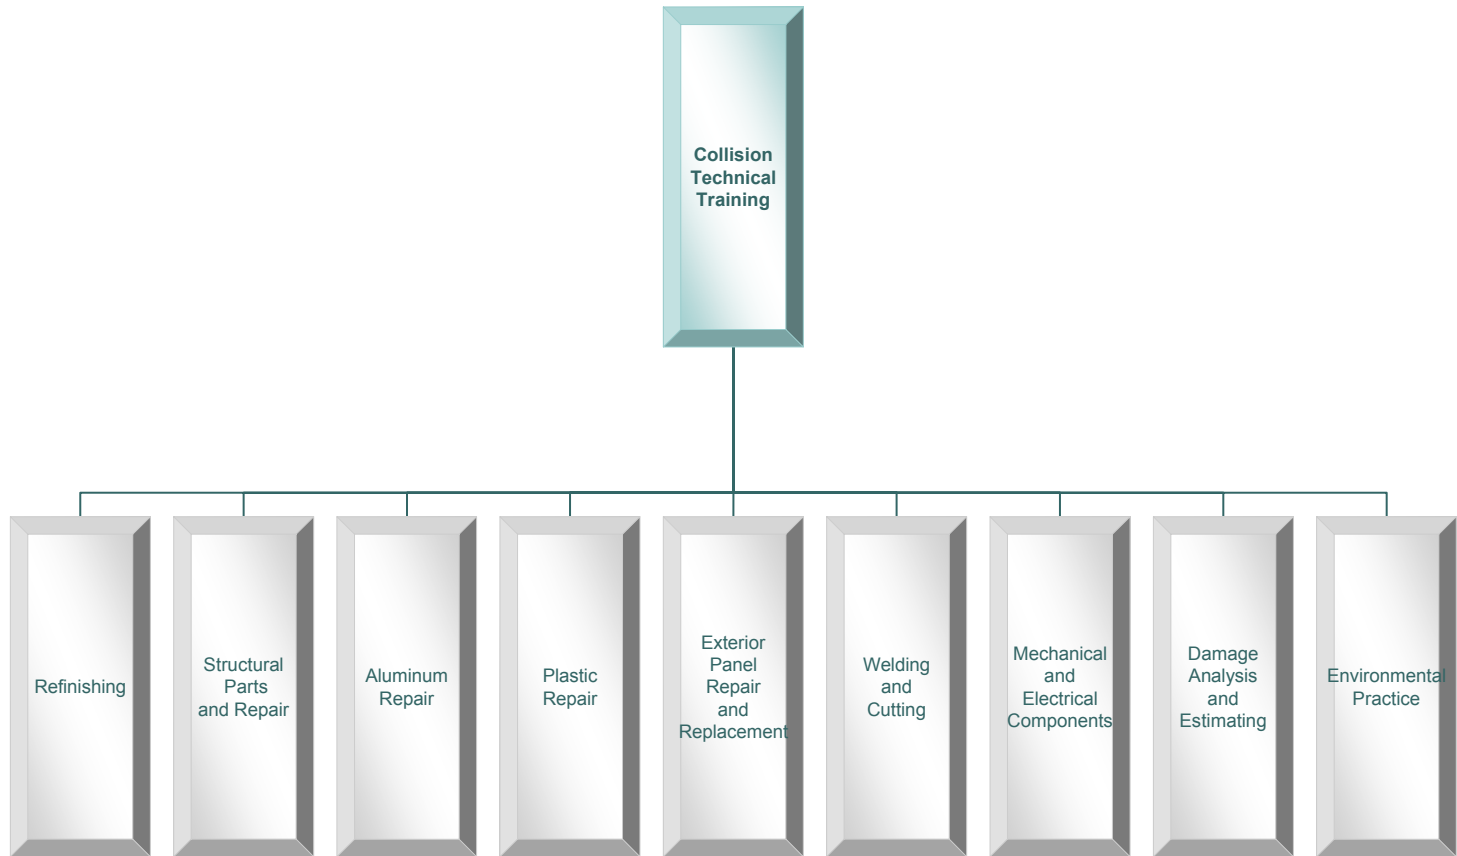

- The objective of the CARS Collision Repair Project – Phase II is to create a delivery infrastructure that will ensure access to high quality training for all industry participants when and where it's needed.
- We are working in partnership with suppliers and training organizations to identify and acquire the best of existing training materials for adaptation to IDL.
- We are building a repertoire of some 120 technical and non-technical IDL courses in both French and English.
- Our goal is to establish a minimum of 200 new receive sites.

Industry Partners

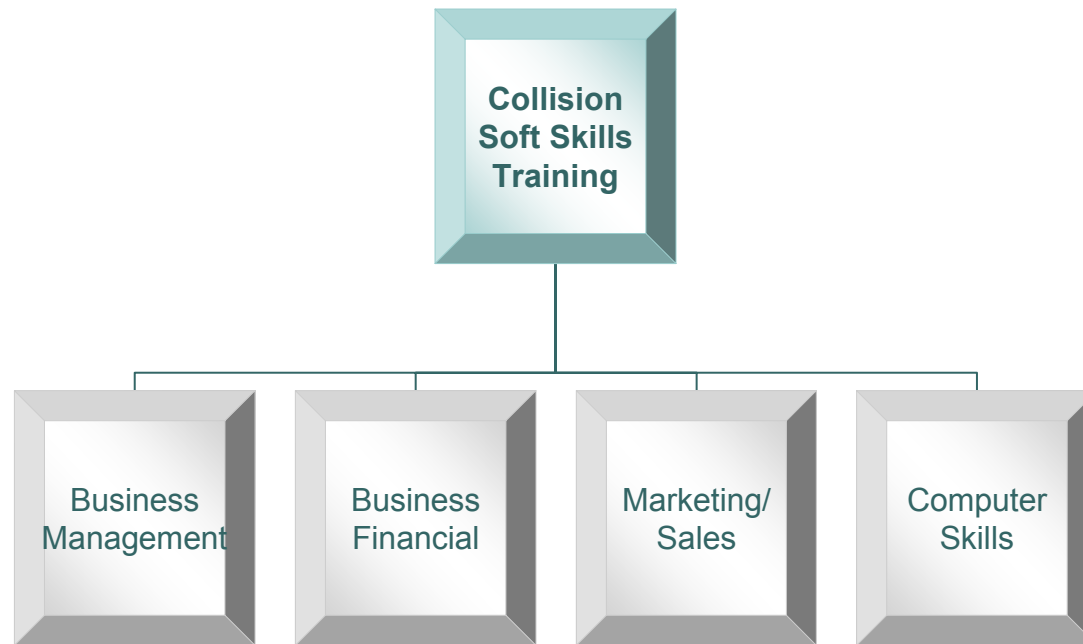

- CARS is proud of the strong links it has forged with its partners including:
 - I-CAR
 - BASF
 - 3M
 - CAR O LINER
 - DuPont
 - Sherwin Williams
 - PPG

Curriculum Outline – Technical Training

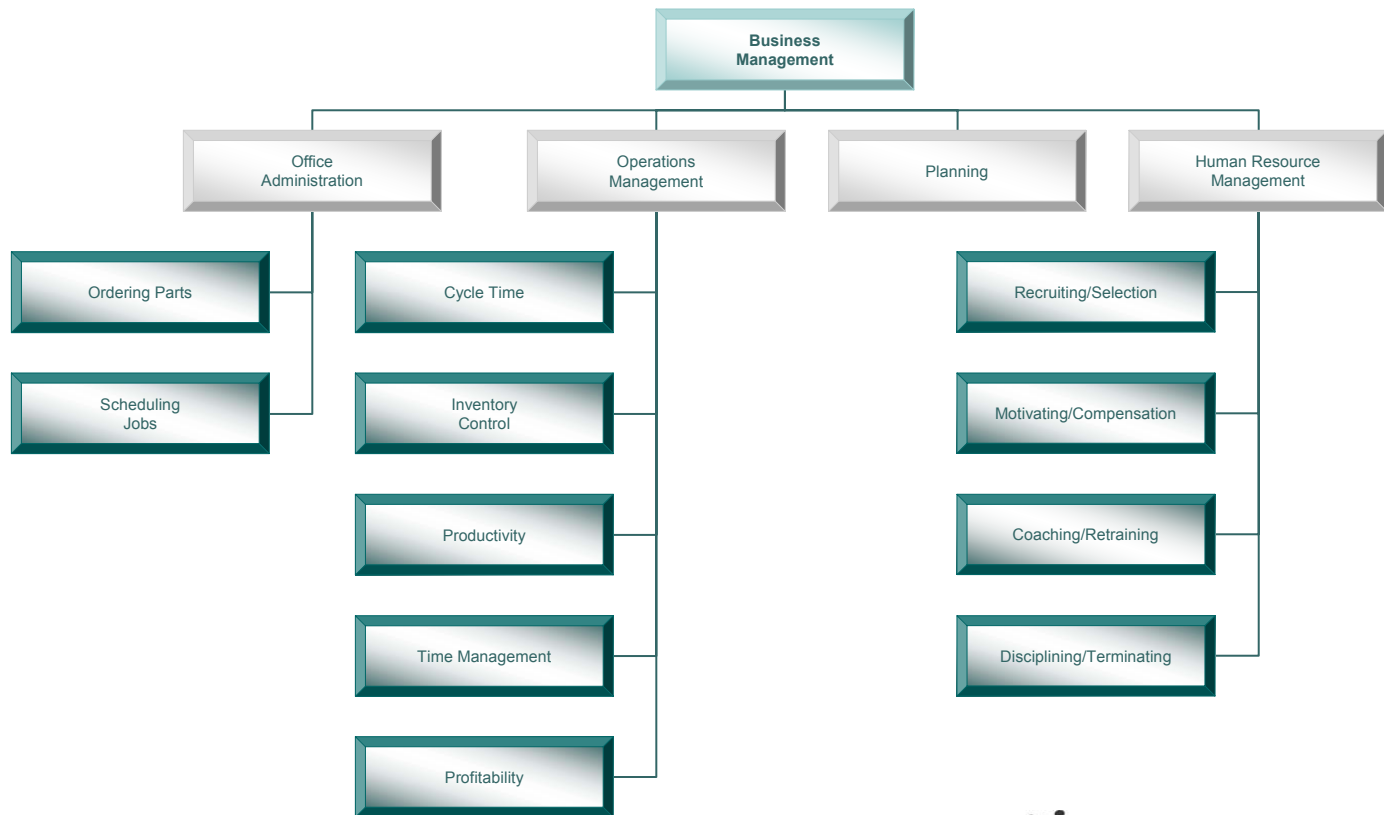

Curriculum Outline – Soft Skills

Curriculum Detail – Business Management

Current status

- Our industry training partners are providing us with the best elements of existing curriculum.
- We have conducted three meetings of working groups to review content from 55 courses selected for migration to IDL.
- We have now established 57 IDL sites within the collision sector.
- We began broadcasting the first migrated I-CAR course on May 3, 2005.
